FINAL REPORT FOR 2005

MESSAGE FROM THE EDITOR

This is the final Weather and Crop Progress Release for 2005. We will resume this report in early April 2006. We would like to give special thanks to our County Agents and the National Weather Service for their ongoing participation.

REPORTING FOR WEEK ENDING November 27, 2005 CROP YEAR

RELEASED: November 28, 3PM - There were 6 days suitable for field work. Soil moisture supplies were 22% very short, 32% short, 43% adequate, and 3% surplus.

CROPS: Producers worked on machinery and made plans for spring planting. Rains Sunday should help some winter wheat germination, emergence, and overall crop development. Some fields were treated for annual rye grass. Many counties were still in serious need of rain.

LIVESTOCK: Livestock were reported to be in fair condition. Cattlemen continued to worm and vaccinate their herds. Most hay had been cut and was being fed to cattle along with supplements. Winter pastures were being fertilized. Rains received helped with cool season forages, but rain is still needed.

Progress %					Condition %				
CROP Stage	Current Week	Previous Week	Previous Year	5 Year Average	Very Poor	Poor	Fair	Good	Excellent
SOYBEANS									
Harvested	100	99	90	95					
WINTER WHEAT					3	7	41	44	5
Planted	99	96	77	90					
Emerged	92	85	69	80
